

Summer School 2020

Coding Boot Camp

Exercises 1

- i. Swap the values of two variables.

```
name_1 = "Bob"
name_2 = "Alice"
# To show the value of variables, or literals, we use print statements.
print(name_1)
print(name_2)
```

- ii. Write a program to print the words of the counting song *Went To Mow A Meadow* using this flowchart as a guide.
